DIGITAL ELECTRONIC COUNTER

Scope Update for Rev Counter

Additional Scope

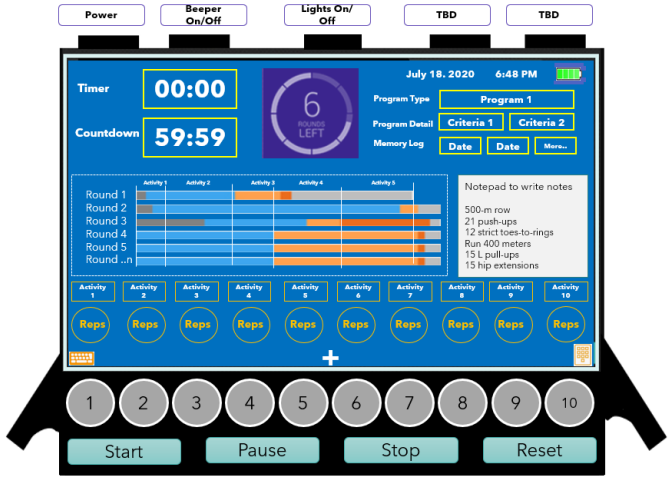

Notes Box

Add a notes box to allow user to type in upto 1024 characters of numbers and text using the onscreen keyboard. The notes should be saved as a part of memory save function and should be displayed on memory recall.

Wireless Clicker

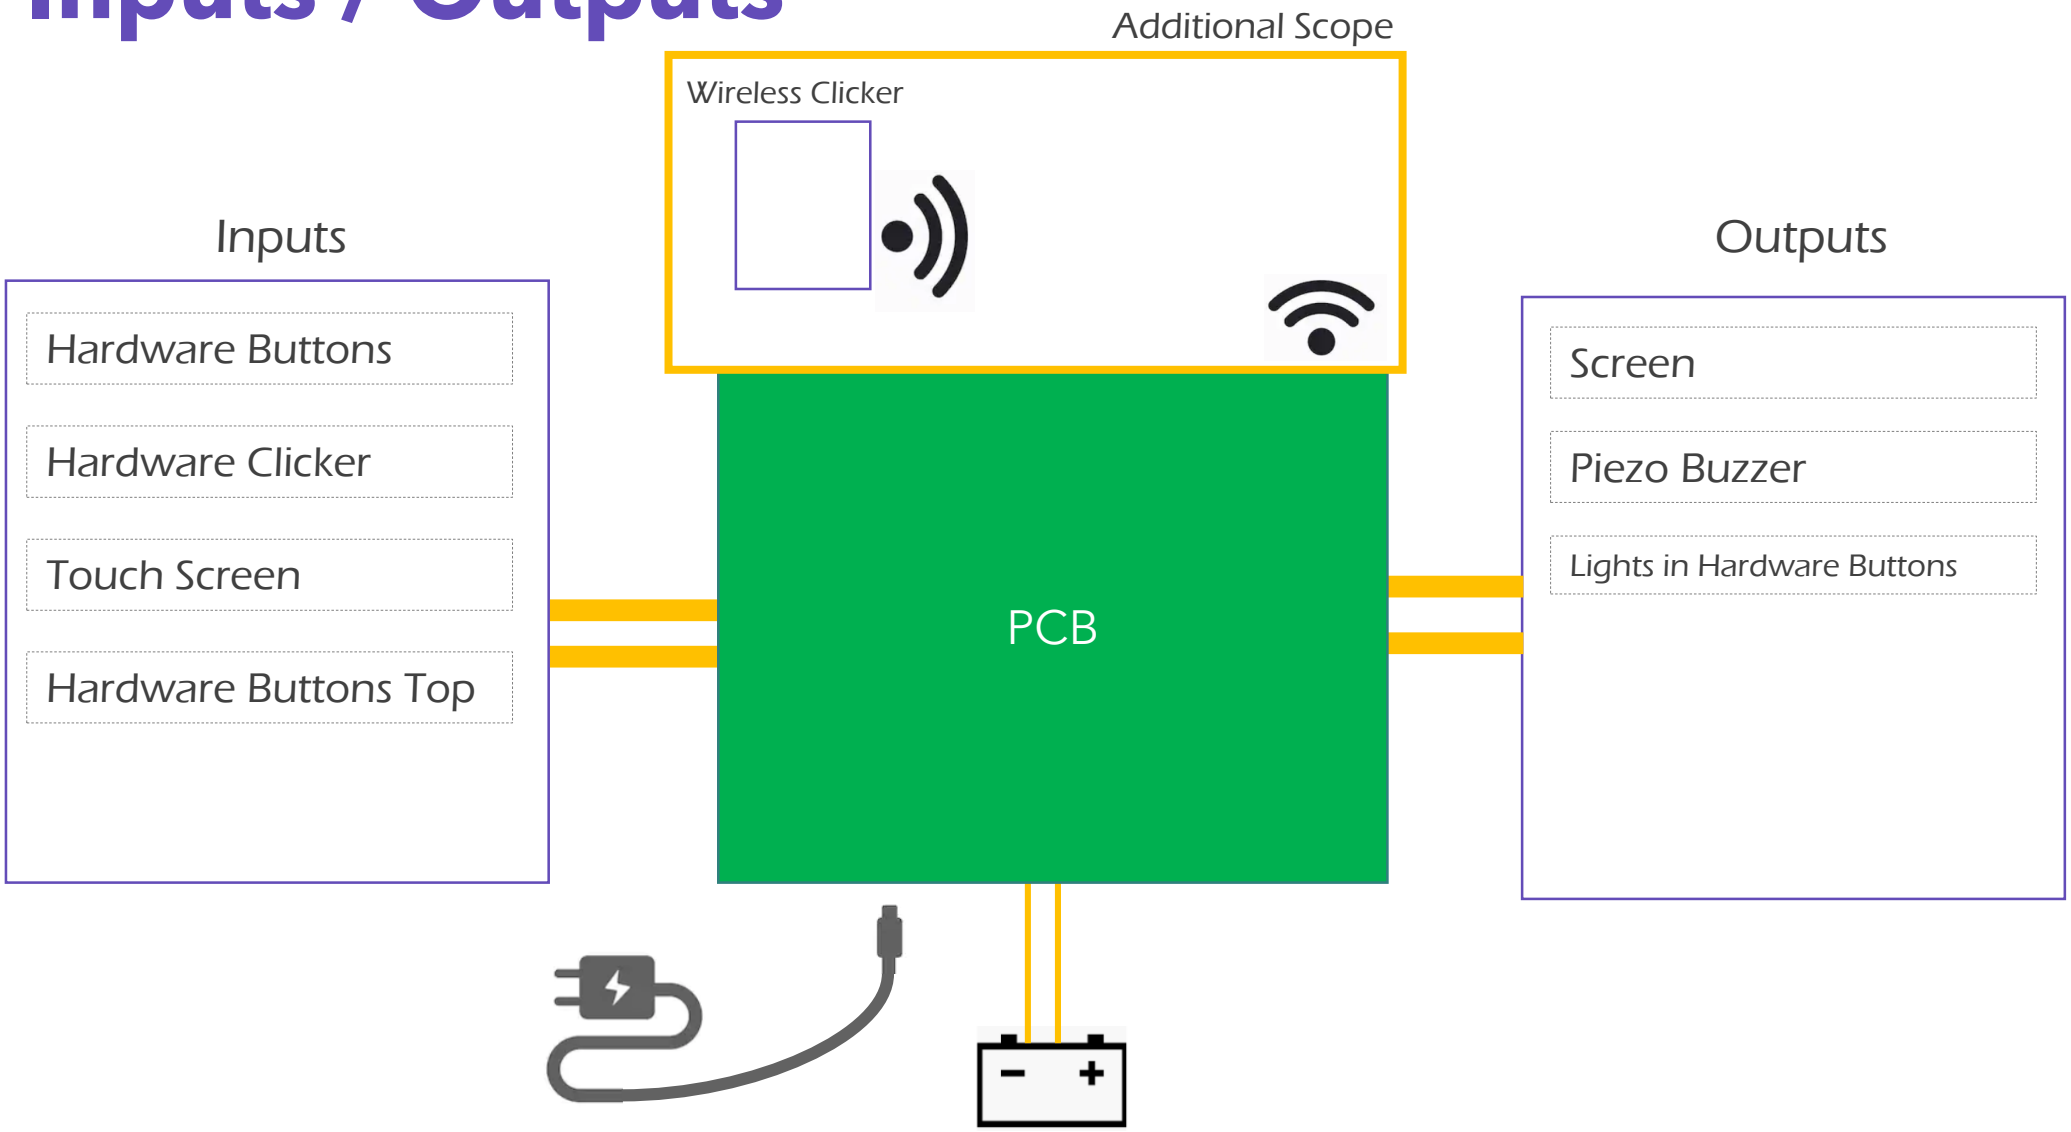

Add hardware and circuitry to pair a wireless clicker that can be used to wirelessly register Activity and Round count.

Wireless Clicker

1. Add on accessory.
2. Can be paired with any rep counter
3. Develop a pairing method.
4. Wireless clicker allows user to toggle and click only two functions.
5. Wireless clicker will have a flashing LED to inform a command has been sent.
6. A sample layout of the clicker is shown below.

OR

1. **Round Button** : simulates the round clicker function wirelessly

2. **Activity Button**: simulates the activity function wirelessly. For Example: If there are 6 activities, each click of activity marks completion of the activity and then the next click marks completion of the next activity, this keeps going in order.

LED Lights!
